

Bucket Filter Assembly Instructions

Use the handheld drill to drill a hole in the bucket. Place hole 75mm (3 inches) from bottom of bucket to allow for sediment accumulation.

Insert bucket connector by placing one washer on either side of hole.

Tighten connector with nut provided.

Screw filter housing to connector.

You are now ready to filter water

If you purchased a prefilter then it should be installed prior to installing the final filter.

Weight: 5.9 oz. Contents: 1 Plastic Bag, 1 Filter Housing, 1 300 mm Tube with connector, 1 Tube clamp, 1 Plastic Hook, 1 60 ml syringe, 1 bottle adapter, 2 Instruction sheets.
